

**AHEAD OF
THE AUTONOMOUS
AGE.**

INTRO

PRAEVANT helps governments, law-enforcement agencies and public institutions understand emerging technologies, anticipate new threats and prepare for an increasingly autonomous world. We work at the intersection of artificial intelligence, robotics, autonomous systems, public security and strategic foresight. Our purpose is simple : to ensure that technological advancement strengthens institutions, protects communities and serves the public good.

WHAT WE DO?

PRAEVANT advises governments and public institutions on the operational and responsible adoption of AI, robotics and autonomous systems. We provide strategy, threat assessment, capability reviews, governance frameworks, scenario exercises and operational-readiness programmes. We also help institutions understand how criminals and hostile actors may exploit emerging technologies — and prepare before those methods become widespread.

AHEAD OF THE AUTONOMOUS AGE.

PRAEVANT

AREAS OF EXPERTISE

AUTONOMOUS SYSTEMS & ROBOTICS

We help institutions assess, govern and integrate drones, robotics and autonomous platforms into operational environments.

AI FOR GOVERNMENT

We advise on sovereign AI, agentic systems, data governance, institutional safeguards and responsible deployment.

OPERATIONAL READINESS

We translate emerging technology into practical policies, exercises, capability roadmaps and decision-ready recommendations.

STRATEGIC FORESIGHT

We develop scenarios that help leaders explore future risks, challenge existing assumptions and prepare for disruptive events.

COUNTER-AUTONOMY & EMERGING THREATS

We support preparedness against the criminal, terrorist and hostile use of drones and other unmanned systems.

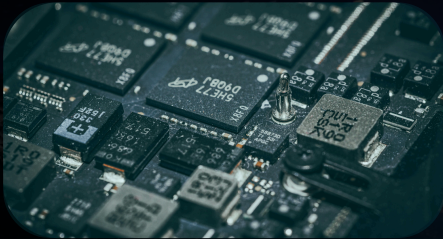

**“TECHNOLOGY
ALONE DOES NOT
CREATE CAPABILITY.”**

OUR APPROACH

Effective adoption requires clear strategy, appropriate governance, operational understanding, trusted data and people who are prepared to use new systems responsibly. PRAEVANT brings together senior advisers, law-enforcement practitioners, technologists, researchers and specialist experts to provide independent & operationally grounded support. **We do not promote technology for its own sake. We help organisations determine what is useful, what is responsible and what will work in practice.**

WHO WE WORK WITH?

**TECHNOLOGY &
AUTONOMOUS-SYSTEMS
COMPANIES**

**LAW ENFORCEMENT
COUNTER-TERRORISM
AGENCIES**

**INTERNATIONAL
& REGIONAL
ORGANISATIONS**

**CRITICAL
INFRASTRUCTURE
OPERATORS**

**DEFENCE
& SECURITY
ORGANISATIONS**

**GOVERNMENTS
& MINISTRIES**

HOW WE ENGAGE

1.Strategic Advisory
Independent senior
advice to leadership.

2.Capability Assessment
Assessment of readiness,
governance & operational gaps.

3.Scenario & Foresight Exercises
Testing institutions against
emerging risks.

4.Programme Design
Development of national,
regional & international initiatives.

5.Specialist Research
Decision-ready analysis of
emerging technologies & threats.

THE FOUNDER

GUILLAUME ALVERGNAT

Guillaume Alvergnat is an international law-enforcement and security adviser with more than 20 years of experience supporting governments, police organisations & international initiatives. His work spans emerging technologies, AI, autonomous systems, international police cooperation and operational capability building.

Through PRAEVANT, he brings together institutional experience, strategic foresight and an international network of specialists to help organisations prepare for the autonomous age.

For advisory assignments, capability assessments, strategic foresight, research partnerships or programme development.
